Mathletics

Mathletics. Made for Manitoba.

Targeted, adaptive and engaging content designed to meet the objectives of the provincial curriculum.

Online activities that align to the MB Curriculum

Designed for the Manitoba curriculum, including well over 1200 individual adaptive practice activities and eBooks for all grades.

Real-Time Reporting

Mathletics reporting is a powerhouse of live data for schools and teachers. Truly powerful tools for data-driven teaching and learning in the classroom.

MB diagnostic assessments for grade 2-9

The Manitoba Learning Assessments in Mathletics have been designed by our math experts, with concepts aligned to specific Manitoba Curriculum Expectations. Learning gaps are identified, generating individual student learning pathways.

Dr. Marian Small Rich Learning Tasks

We believe students learn by doing. A great example of this are our Rich Learning Tasks.

Not only that!
 Now includes Dr. Marian Small's professional development videos.

Rich Tools for Learning

Students benefit from the convenience of having all study materials in one place. Mathletics is equipped with a My Study area containing informative interactives, videos, and eBooks. This empowers students to supplement their learning in a way tailored to their style – captivating every type of learner!

Manitoba Teachers Love Learning With Mathletics

“Wow! We are in the second year of using Mathletics school wide and the students all LOVE it! It is easy to use for both staff and students! I love being able to monitor individual student results and set tasks that they can feel good about accomplishing. One of the great things about the program is being able to set different levels within the same class and the students don't realize it as often everyone is doing something different! The students are engaged whenever they are on the program at school and the parents love having it for them to use at home! ”

School: Polson School.
Teacher: Wendy Skoglund, Manitoba
Grade: 5

“I have found Mathletics extremely valuable in solidifying concepts with students who are average or strong in Math. As well, I have found that my struggling Math students are more engaged and willing to try concepts through the Mathletics program. They see the live Mathletics as a “reward” and love to use it.

Mathletics is an extremely valuable asset to my Math program. We use it often and I supplement my classroom teaching with it. I find that it is very user friendly. I also feel like there is an incredible number of resources on the site for teachers to use. It is an extremely valuable program that is teaching kids to love learning Math. I am seeing a transition in the students who hated math, they are now looking more forward to Math. Mathletics has changed how I teach Math. An extremely valuable program that provides instant assistance if needed! ”

School: Meadows School
Teacher: Kathy Banks
Grade: 7/8
