

Getting to know... mid and end challenges

Challenges are located mid-way through and at the end of each topic. These challenges test a student's understanding of a topic.

Students select or enter an answer for each of the questions before submitting the challenge for automatic marking. They then receive their results - and can browse through the questions seeing the actual answer with an explanation on any questions they got incorrect.

Students may retry the challenge as many times as they want, with the last attempt displayed as their current mark.

All questions are categorised as:

- Knowledge – starting with straightforward questions that require some simple knowledge recall
- Application - slightly more complex questions that demand application of the fundamental concepts behind the topic
- Reasoning – challenges students further still and require a solid grasp of the topic; the ability to apply knowledge gained from multiple activities.
