

Primary Student Console Map

Mathletics

Learn gives students access to practise activities and support materials, designed to consolidate a deeper understanding of concepts.

Play offers a range of engaging games and apps, including the famous Live Mathletics where students can challenge other students around the world and boost their maths fluency.

Review is where students can access assessments that have been set by their teachers.

Student interface is customisable, allowing students to build their own personalised avatars, modify their background and unlock rewards.

Topics displayed align to the curriculum. With this view, you can find activities and additional resources such as eBooks, interactives and videos that are relevant to the content – meaning students don't need to hunt for resources; they're always right at their fingertips.

Teachers can use diagnostics to establish their students' learning paths and assign activities, while still supporting students to work independently and make learning choices based on their progress.

Traffic light system allows students to easily track their progress through each topic. Red signals require additional study, yellow signals indicate that the student's understanding is developing, green shows evidence of mastery.

Search functionality allows students to quickly find a topic they are looking for, or areas they need to spend further time on.

My Daily Points displays how many points students have earned for the day. Points are awarded for correct answers in activities, tests and Live Mathletics.

My Progress shows the total number of activities completed, with the results clearly displayed, to allow students to identify strengths and weaknesses of their own learning.

The progress area gives students a direct line to topics they are still expected to master. Because students will not automatically be prevented from continuing on within their curriculum course, student-driven learning can truly be fostered.

The screenshot shows the 'Primary Student Console' interface. At the top, there are navigation buttons for 'Mathletics', 'Learn', 'Play', and 'Review'. A '20 Points this week' badge is visible. The main area is titled 'Topics' and lists various math topics with traffic light indicators (red, yellow, green) and numbers. To the right, there is a student profile for 'Annabelle' from 'Serenity International Primary School, Year 5'. Below the profile, there are sections for 'My daily points' (displaying 20) and 'My progress' (displaying a pie chart and 'All activity results').

| Topic | 1 | 3 | 5 | 12 |
|----------------------------------|---|----|---|----|
| NA - Number and Place Value | 1 | 3 | | |
| NA - Addition and Subtraction | 8 | 23 | 5 | |
| NA - Multiplication and Division | | | | 12 |
| NA - Fractions | | | | |
| NA - Decimals | | | | |
| NA - Money | | 23 | 5 | |
| NA - Patterns and Algebra | | | | |
| MG - Units of Measurement | 8 | | | |
| MG - Shape | | | | |
| MG - Location and Transformation | | | | |
| MG - Geometry | | | | |
| SP - Chance and Data | | | | |
