

Preparing for the new academic year: Rollover Guide

Mathletics

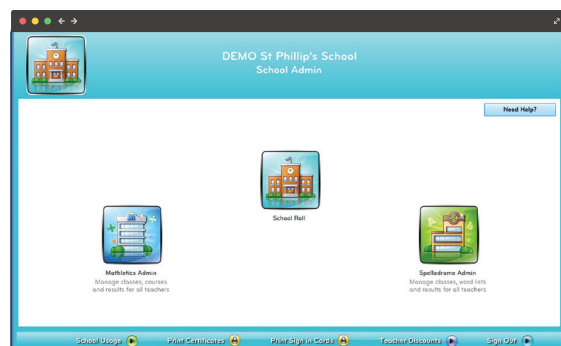

Spellodrome

It's that time of year again! Arguably the most important task at the start of the new year is to move your students into their new classes. This makes sure that every student's account is linked to the most appropriate curriculum content and that their results data is available to their new teacher. We call this process The Rollover.

The process is the same for Mathletics and Spellodrome. This guide will walk you through the process...

Step 1: Access your current school roll data

- 01** Sign in using your school's Admin Console login details (contact the Customer Support Team if you do not have them).
- 02** Click on **School Roll**, then **Rollover**.
- 03** Select your resource from the drop down list, and click **Download School Roll**.
- 04** Your current student and class settings will download in spreadsheet format.

Step 2: Update your data spreadsheet for the new year

- 01** Open the downloaded spreadsheet, and sort your spreadsheet by **Year** then **Class Name**.
- 02** For any leaving students, delete the entire row.
- 03** Update the **Year**, **Class** and **Teacher** columns for the first child in each class, then copy these details to apply to the rest of the class.
- 04** Add any new students in the first available rows of your spreadsheet, filling out all columns.
- 05** **Save** a copy of your edited spreadsheet to your Desktop.

CHECKLIST WHEN EDITING YOUR DATA:

- ✓ Do not edit any student names on the spreadsheet. This is how the system recognizes each account. If needed, these can be changed later.
- ✓ Each student name must be unique. If you have two Tom Smith's, consider a second spelling, such as Thomas, or updating the surname to Smith.
- ✓ If you have a mixed-year or composite class, make sure the class name is the same for all students. Each student will be assigned curriculum content relevant to the year level given in the GRADE column.
- ✓ If a class has more than one teacher, ensure all teacher names are included at least once in the relevant rows of the spreadsheet. This will make sure all teachers can access results data from their classes.
- ✓ If you have Kindergarten students, make sure the GRADE column contains the letter 'R' only.

Step 3: Upload your new student and class settings

- 01** Navigate back to the Admin Centre and click **School Roll**, then **Rollover**.
- 02** Select your resource from the drop down list and select **Continue**.
- 03** Copy all the data from the spreadsheet excluding the headers (Ctrl + C).
- 04** Click into the top-left empty cell and paste (Ctrl + V) your data into the grid.
- 05** Click **Save** then choose **Full Rollover** to process your **new** school roll.

YOU'RE DONE!

- 01** Your student accounts will now be moved into their new class configurations for the new school year, along with being assigned new curriculum content.
- All existing usernames and passwords will be retained – with new ones generated for any new students. The students you removed from your spreadsheet will have their accounts deactivated.
- 03** If you need to access sign-in cards for any new students, or reprint some for existing students, you can do so by clicking Print Sign In Cards at the bottom of the screen.
