

Arizona Educator Numeracy Grant Program

brought to you by Mathletics

Inspire the Love of Learning in Your Classroom with Mathletics

The Atlanta Educator Numeracy Grant gives the unique opportunity for exceptional elementary, middle and high school educators to implement the online math program, Mathletics, in their classroom **free for 6 months**.

What is the grant for?

The grant provides full use of Mathletics for students, teachers and administrators with initial and ongoing support.

Who can apply?

The program is open to elementary, middle & high school classroom educators (grades K-12) who teach mathematics in the US.

How many students can use the program?

The grant allows teachers to use Mathletics with two classrooms (total of 70 students + 2 teachers).

How many teachers can participate?

Up to two qualified educators per school may participate. Please note that educators may only be awarded a grant for a single 6-month period.

“ My students take pride in receiving their certificates each Monday and are motivated by the healthy competition to succeed each week. ”

What is Mathletics?

Mathletics is the world's most used K-12 online supplemental resource for numeracy. The program provides students with targeted and adaptive math practice as well as engaging fluency competitions.

Case study: Improving standardized test scores

After two years of instruction with Mathletics, a Los Angeles-based school conducted a study into the impact of the resource on their standardized test scores.

“ I love Mathletics because I am able instruct students at their appropriate level, level and ensure they gain the knowledge they need to succeed! Mathletics makes it easy and effective to search a concept at various levels, so I am always able to provide four differentiated assignments.”

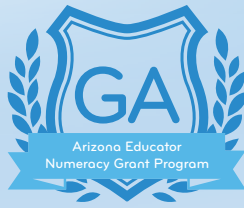

Jeannie Gilespe, Teacher

“ The enthusiasm of the students to participate in Mathletics is contagious and quickly spreads throughout the mathematics classes in school. It is refreshing and encouraging to observe the students' enthusiasm. Math is an integral part of our students' education and success.”

John Schussler, Teacher and Technology Coordinator

Additional Information:

What methods or programs are you currently using to help supplement your math instruction?

How could focusing on targeted, adaptive practice help you address the challenges your students face in mathematics?

This grant requires an average student use of three times or 1 ½ hours per week. How would you plan to integrate Mathletics into your instructional program to accommodate this requirement?

* Please note that educators of Arizona-based K-12 schools may only be awarded a grant for a single 6-month period. Limit one grant per school building.

Requirements:

1. To be accepted into our Grant program, we also require that you are able to meet these requirements:
2. You confirm that the computers and/or mobile devices you will be using with students are able to run Mathletics. Please refer to the technical requirements for more information.
3. You agree to our website's Terms and Conditions.
4. You agree to actively participate in a 40-minute webinar training session within three months of acceptance into the Grant program and one additional 40-minute webinar thereafter.
5. You agree to have your students use Mathletics at least once a week. Options include usage during classroom time, in computer labs, during after-school programs, and at home.
6. Teacher usage: you will assign a minimum of one task per student per school week and assign at least one assessment to every student.
7. You will share this information with your Principal and provide one demonstration session to all teachers within your school during the school year. You will show Mathletics to 3 other teachers within your school district during the school year.
8. You agree to provide periodic feedback, in the form of surveys.
9. Data accumulated during the school year will be collected and used for promotional material. You will provide permissions to use this information (the data will be anonymized).
10. You agree to be contacted by a Mathletics representative during the Grant period for feedback and implementation support.
11. You will provide a testimonial and/or pictures of your classroom – guidelines for the testimonial to be provided by 3P Learning.
