

Coordinating your school's rollover?

Google is releasing an update to Chrome 69 4 September 2018 (and Chrome 70 mid-April)

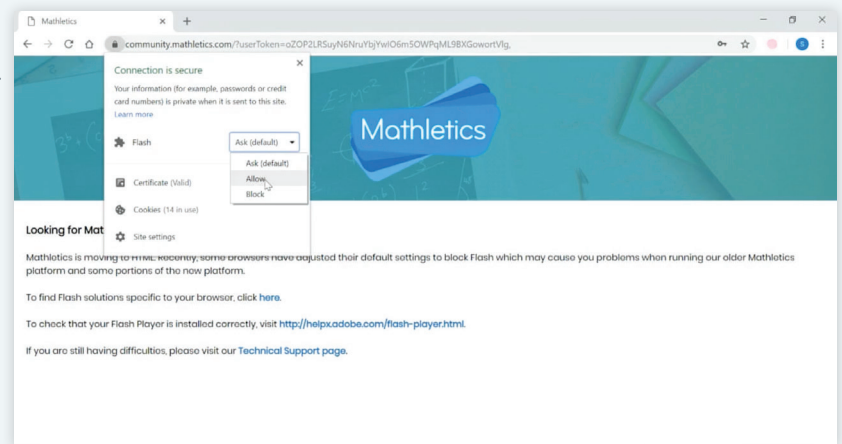

- These new releases of Chrome impact access to Flash versions of Mathletics/Spellodrome Admin Console, by defaulting Flash settings every time the Chrome browser is closed.
- School Administrators need to access the Flash version of Mathletics/Spellodrome to download the School Roll for Mathletics or Spellodrome in order to complete your school's rollover.

Steps to enable Flash for School Admins

Easily modify your permissions to allow Flash to run.

This should enable you to access the school admin centre to perform your updates and complete your school rollover. It's not possible to save these settings, so you will need to do this each time you restart your browser. If you are experiencing any difficulties, please contact our customer support team who will be happy to assist you with your enquiry <http://www.3plearning.com/contact/>.

1. Sign into www.mathletics.com or www.spellodrome.com with your School Admin username and password. It will initially display a *Looking for Mathletics in Flash?* message.
2. To enable Flash for this session, click  in the top address bar.
3. Then select the Flash 'Allow' option.
4. To apply your settings, click on the Mathletics page and then click 'Reload' at the top of the page and the MATHLETICS FLASH PAGE will display as intended.

5. In School Admin click *School Roll* then *Rollover* and follow the instructions.
6. You will need to Allow Flash **each time** you access the Admin Console.
